# GRADY HIGH SCHOOL

## Neighborhood Updates

COOPER CARRY

### ABOUT THE PROJECT

Over the next two years, Parrish Construction Group will be adding a four story addition to Grady High School. There will also be renovation projects throughout the existing buildings during the summers of 2020 and 2021. Once the project begins and throughout the life of the project, we will post periodic updates on an APS site page for your reference. We are also communicating the updates to Midtown Neighbors' Association. MNA has committed to sharing our updates on a dedicated project page on their site: [www.midtownatlanta.org/gradyrenovation](http://www.midtownatlanta.org/gradyrenovation).

### UPCOMING CONSTRUCTION

Over the next few weeks you will see fencing surrounding the jobsite with a temporary jobsite trailer, security station, and entrance on 10th Street. This ensures safety and separation of students, neighbors, and the public.

We will continue to diligently work to minimize disruptions to the neighborhood including adhering to the City of Atlanta noise ordinance. Any noise variance will be limited and notification will be provided to the community in advance. If you have any questions or concerns, please feel free to contact us.

We look forward to cutting the ribbon of this beautiful, learning facility for the Grady High School students that will serve as a point of great pride for the community. Thank you for your patience and for your support of this project, Grady High School, and Atlanta Public Schools.
